Cloud services

FLEXIBLE AND CUSTOMIZABLE VIRTUALISATION TECHNOLOGY, SUITABLE FOR ANY DEVICE

Ludium

WHAT WE CAN OFFER WITH OUR TECH

VIRTUAL GAMING

Companies looking to enter the world of cloud gaming may choose to acquire Ludium Lab's technology and industry expertise to launch their own customised products in the cloud.

VIRTUAL SERVICES

Aimed at software development companies, publishers or educational services, they will be able to use Ludium Lab's virtualisation technology in the cloud to open up a completely new and easily accessible market, which does not require high-performance hardware from customers.

VIRTUAL APPS

Designed for the convenience of consumers, they will have at their fingertips an extensive catalogue of applications and software in the cloud that will offer the best solutions, without the need for overly powerful devices.

THE TECHNOLOGY FOR EVERY NEED

In any device
Bring any software to our cloud technology and use it in any device.

Whitelabel
Your own cloud gaming / software platform fully adapted to your brand and needs.

Low consumption, high performance
Don't waste your internal storage and run your games & apps with a low latency.

Parental control
Let your child enjoy videogames on a safe environment.

Multiplayer
Create parties on the Virtual Room to play on local or online multiplayer.

Mobile as a Gamepad
Developed for gaming, with Ludium Lab's SoraPad, you won't need extra devices to play.
